

AGUSTIN GARZON MACEDA

MOTORSPORT ENGINEER

Cover Letter | Open Application, Toyota Gazoo Racing

25 April 2023

Dear Selection Committee,

Since I was 17 years old when I started racing as a rally driver in my country, I realized that I wanted to dedicate my professional career to the world of motorsport. Having knowledge in performance engineering, excellent understanding of vehicle dynamics and of analytical tools, and experience on the development of electrical vehicles, I am glad to offer my skills for any position you consider appropriate at the Toyota Gazoo Racing Team. .

I had the unique chance of starting in this world early in my life, as electro mechanical technician and rally driver. This has given me a strong backbone for a young professional. In my former role as Manager in Hamelbot, I put in practice my knowledge of vehicle dynamics for the design of the company's electric vehicles. An example of my organization skills and ability to handle pressure is my experience as Technical Director at a rally team, where the team successfully completed the 5 races of the 2019 FIA Codasur Championship, achieving the first place. In this role I also set up the car with the team during test and events.

After two years working professionally, I decided to pursue a Master's in Motorsport, to follow this work path. I am reinforcing my knowledge in Performance Engineering, for example, through data analysis with Wintax and calculus tools with Excel. Furthermore, I am acquiring experience in simulation tools and DiL sessions.

I would be honored to support Toyota World Rally Team within a company such as Toyota Gazoo Racing, which has more than 70 years at the top level of rallying. I am certain that my background, skills and commitment will allow me to go beyond the high-quality work required for this position. I thank you for your consideration and remain at your disposal to discuss this further.

Sincerely,

Agustin Garzon Maceda
